

## JLeon Enterprises

Certifications: MBE

[www.thefacilitycaregroup.com](http://www.thefacilitycaregroup.com)

**JLeon Enterprises** began as a dedicated cleaning company committed to delivering pristine environments for its clients. Over time, recognizing the broader needs of facility management, the company strategically expanded its services. This transformation led to a comprehensive, streamlined facility service model encompassing a wide range of solutions, from specialized restoration cleaning to plant installation and care, as well as light-duty maintenance. A key differentiator in JLeon Enterprises' expanded service offering is its fast, reactive maintenance supply delivery, ensuring that facility needs are met with unmatched efficiency and speed.

The company's core focus is to provide an efficient and effective approach that significantly reduces the burden on facility engineers. By handling routine and reactive maintenance, JLeon Enterprises enables internal teams to focus on specialized duties and strategic initiatives within facility operations. The company's mission is clear: to protect and maximize client investments. This is achieved by ensuring that properties are not only well-maintained but also continually improved through thoughtful enhancements, ultimately contributing to the long-term value and functionality of each asset.

**Jay Barrett** earned a degree in Technology and Business from the University of Maryland, Baltimore County, and went on to work across several business sectors, integrating technology and business operations. Through various opportunities and learning experiences, he developed a strong passion for facility care and the management of commercial properties.

With this passion as his foundation, James launched a cleaning business as a way to better understand the needs of building owners and property managers. By listening closely to the challenges they faced, he identified a consistent gap where reliability, integrity, and responsiveness were critical to daily operations. In response, he expanded his company's services to meet those needs and now provides support across three major sectors of facility care: restorative cleaning services, indoor plant care and courtyard services, and light-duty maintenance with project supply delivery.
